Refroidisseur THERMOKING

The image shows the interior of a white, rectangular cold storage chamber, likely for a truck. The walls, floor, and ceiling are all white. A Thermo King refrigeration unit is mounted on the ceiling, with green refrigerant lines running across it. A small, square light fixture is visible on the ceiling. On the right side, there is a vertical rectangular panel, possibly a door or a window. The floor is a smooth, light-colored surface. The overall appearance is clean and professional.
